OUR SERVICES

Expel Managed SIEM

Get the SIEM you paid for, without the headaches you didn't.

Your challenge

Your SIEM should be a precision instrument for finding threats. Instead, it's a full-time job just keeping it healthy. Between tuning noisy alerts, monitoring data pipelines, and watching storage costs spiral, your team is drowning in operational overhead. Meanwhile, legacy managed service providers want you locked into their platform where they profit when your data volume goes up, not down. You need expert help that actually reduces your SIEM bill and operational burden, not a black-box service that adds to it.

How we help

Expel Managed SIEM brings our MDR expertise directly into your SIEM environment to handle the heavy lifting of detection engineering and pipeline health. We provide a transparent, co-managed model where our experts write, tune, and maintain your rules while proactively monitoring for data loss or normalization drift. You see every decision in real-time through Expel Workbench™, ensuring you maintain full control and ownership of your detection logic without the secrecy of traditional providers.

Elite outcomes, zero black boxes

Specialized expertise

Detection engineers and platform experts without the FTE costs and six month hiring timelines.

Full IP ownership

All detection logic we author in your SIEM belongs to you.

No customization tax

Custom rules, internal app parsers, and tuning are included in your subscription.

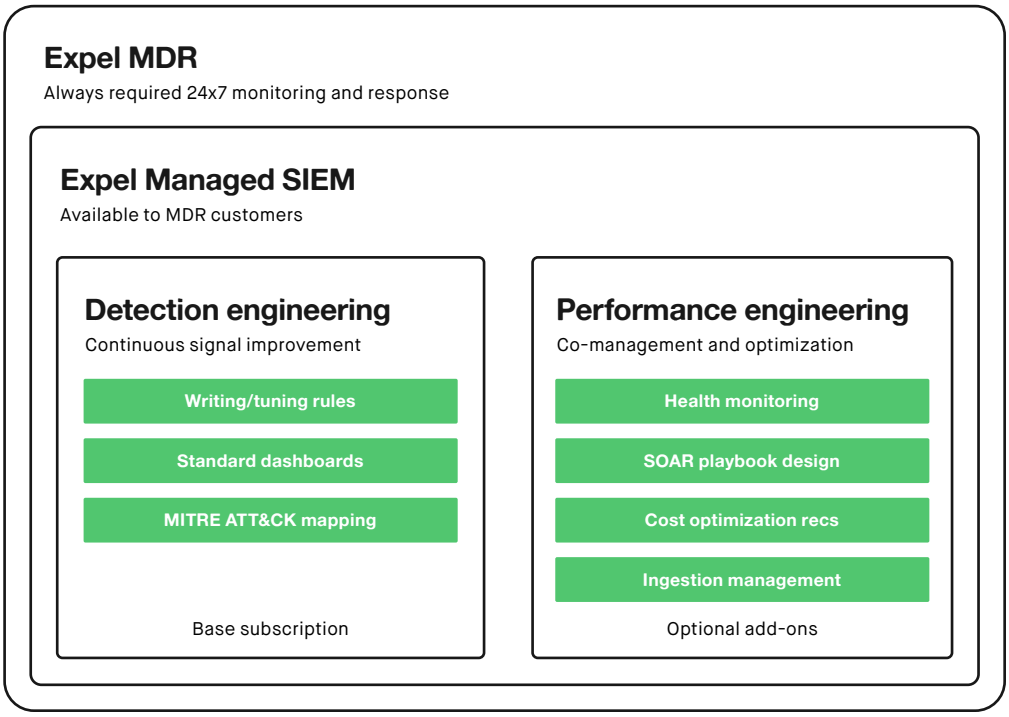
Continuous visibility assurance

Proactive pipeline monitoring stops ingestion breaks before they're blind spots.

Expel is bringing the same detection engineering excellence that powers our MDR directly to your SIEM. With 10+ years of expertise and 500+ customers, we provide the collective intelligence your SOC needs to stop firefighting and start hunting.

How it works

Your Expel MDR customers can now subscribe to Expel Managed SIEM for detection engineering services, with options for additional performance engineering services.



Why Expel

High-performance security outcomes

We refactor your detection strategy—we aren't just "watching"your SIEM. We write and tune rules using collective intelligence, mapping coverage to MITRE ATT&CK to close gaps.

True partners with no conflict of interest

We don't require you to buy your SIEM through us or profit from your data volume, so our only incentive is to optimize your security and lower your SIEM costs.

Flexibility for your unique environment

We meet you where you are, regardless of environment complexity. Our experts handle the manual toil, from ingestion management to SIEM logic translation.
